IDENTIFIERS Library Users; *Online Database Information Network; Pennsylvania

ABSTRACT

Policies and procedures are outlined for the Online Database Information Network (ODIN), a cooperative of libraries in south-central Pennsylvania, which was organized to improve library services through technology. The first section covers organization and goals, members, and responsibilities of the administrative council and libraries. Patrons served are then defined for public libraries, academic libraries, and the State Library of Pennsylvania. A description of interlibrary loan (ILL) services includes the goal, participating libraries, host destination and responsibilities, referral to OCLC, and procedures. Topics covered for commercial, local, and online databases are costs, rates, financial obligations, responsibilities of searchers (maintenance of effort, scheduling of appointments and interviews, the search, post-search), and signon and signoff. Appendices include a table for computing SOURCE and COMPUSERVE online charges; questions and answers about commercial databases; the ODIN interlibrary loan time schedule; an ODIN directory; an ODIN search request form; a summary of facts about ODIN; ODIN structures for interlibrary loan, the local database, and for accessing commercial databases, new ILL log-in instructions; and an ODIN log sheet. CHAPTER ONE

Organization and Goals

1.1 Definition

The Online Database Information Network (ODIN) is a cooperative of libraries in Southcentral Pennsylvania organized to improve library service through technology.

1.2 Goals

ODIN exists to broaden access to information in Southcentral Pennsylvania through technology by:

- expediting interlibrary loan requests.
- providing access to commercially available online databases.
- developing and providing access to local databases.

1.3 Members

The membership of ODIN consists of the following libraries:

Bosler Free Library

Cumberland Valley School District

Dauphin County Library System (Administrative Council)

Harrisburg Area Community College (Administrative Council)

Lebanon Community Library

Pennsylvania State University, Capitol Campus (Administrative Council)

State Library of Pennsylvania

West Shore Public Library

1.4 Responsibilities of Administrative Council

The Administrative Council provides policy direction for the cooperative, including the following:

- expending project funds to provide initial equipment, training and software necessary for ODIN services in member libraries.
- developing documentation necessary to operate system services.

- providing reports to grant administrators regarding the project.
- developing proposals for further development of ODIN.
- establishing recommended rates for online database services among participants.
- providing information regarding hardware, software, documentation and maintenance sources for ODIN participants.
- providing publicity and public demonstrations regarding ODIN services.
- establishing time schedules for access to various parts of the ODIN system.

1.5 Responsibilities of the Member Libraries

.51 Member libraries are responsible for maintaining one ODIN station, including:

- keeping hardware in an operating condition.
- maintaining compatible software for the ODIN system.
- maintaining documentation for carrying out the various ODIN functions.
- maintaining accounts of the various databases used as a part of ODIN, including identification number and password security.
- providing supplies needed to operate equipment.
- reporting use and other statistics requested by the Administrative Council.

.52 Member libraries are responsible for providing liaison to ODIN Members Council.

.53 Member libraries are responsible for providing access to ODIN training for their staffs.

.54 Member libraries are responsible for the quality of ODIN services provided by their library.

CHAPTER TWO

Patrons Served

2.1 Public Libraries

All residents of Cumberland, Dauphin, Lebanon and Perry counties who possess valid library registration are eligible for ODIN service at their participating public library.

Individuals who are students, staff or faculty at Cumberland Valley School District, Harrisburg Area Community College and Pennsylvania State University Capitol Campus will normally be referred to those institutions for service.

2.2 Academic Libraries

Cumberland Valley School District, Harrisburg Area Community College and Pennsylvania State University Capitol Campus will normally limit access to ODIN to the students, staff and faculty of their institutions.

2.3 State Library of Pennsylvania

The State Library of Pennsylvania will limit its participants to local database activities.

CHAPTER THREE

Interlibrary Loan Procedure

3.1 Goal

ODIN Interlibrary Loan has been conceived as a means to provide access to and more efficient exchange of needed material available within the Harrisburg Metropolitan area.

ODIN provides

- access to 2 academic collections and 4 public library collections not currently or totally available through OCLC.
- more rapid document delivery: requests are placed, responses received, and material prepared for delivery (if available) within 1 working day.

3.2 Participating Libraries

(as of September 15, 1983)

Bosler Free Library, Carlisle
Cumberland Valley School District
Dauphin County Library System
  Central ILL department
  East Shore Area Branch
  Hershey Public Library (affiliate)
Harrisburg Area Community College, McCormick Library
Lebanon Community Library
Pennsylvania State University Capitol Campus
  Heindel Library
West Shore Public Library, Camp Hill

3.3 Host Designation and Responsibilities

.31 The Dauphin County Library System will act as the host for the network.

.32 Responsibilities will include

- determining that all participating members have essential equipment.
- research of communications software appropriate for use by members with TRS-80 Model IIIs
- development and maintenance of the Interlibrary Loan program using the TRS-80 Model 16 with hard disk drive.
- design of a workable telephone call-in schedule.
- establishment of the expanded delivery system to include network members which are not part of the district center program.
- training of personnel in local libraries in the use of the ILL system.
- identification of appropriate new software as it may be developed.

3.4 Participatory Library Responsibilities

Agreement of participation infers that participatory member libraries will not only request material from other libraries within the network, but will also supply any requested material that is available within their collections. The exception to this assumption is Cumberland Valley School, which will not supply, because of the nature of both its constituents and collection.

3.5 Referral to OCLC

The Dauphin County Library System as the Harrisburg District Center will automatically enter each locally unfilled request made by a public library into the OCLC Interlibrary Loan subsystem, unless instructed otherwise.

3.6 Procedures

Because the "hands on" procedures of accessing and working with the Interlibrary Loan System have gone through numerous changes and are still not perfected, daily procedures are not included in this manual. A foregone assumption is that author/title or periodical citation requests have been verified as much as possible before the request is entered.

6.1 Attached are the most current log-in, format, and telephone schedule instructions.

CHAPTER FOUR

Commercially Available Online Databases

4.1 Costs

All persons eligible for service will be charged at the same rate, without regard to location. Member libraries may, at their discretion, absorb all or part of the charges to their users.

4.2 Rates

Rates will be based on those charged by the various database vendors.

.21 Rates charged for DIALOG searches will be those listed at the end of each search session, plus offline charges (if any) and telecommunication charges.

.22 Rates for COMPUSERVE and THE SOURCE are established in Appendix 1. Take the appropriate rate per minute and multiply times the number of minutes reported at the end of the session.

4.3 Financial Obligation

.31 Patrons are financially responsible for all services requested, regardless of results.

.32 Patron payment should be made at the time results are provided. Payment should be made in cash or by personal check.

4.4 Responsibilities of Searchers

.41 Maintenance of Effort

It is the searcher's responsibility to keep informed of the latest developments and new techniques for effective searching through literature and documentation. Periodic review of search manuals and guides is recommended, particularly for searchers who search less than weekly. Individual searchers are responsible for maintaining currency in searching through attendance at workshops. Participation in TUVOLUG, PARLIE and other online organizations is encouraged.

Searchers are encouraged to consult with the search coordinator at Dauphin County Library and with other searchers should problems arise or be anticipated with a search strategy or with online techniques. See Appendix 2.

.42 Scheduling of Appointments and Interviews

The searching process normally begins by providing the requestor with a search form and information sheet. See Appendix 3 and 4. The person providing the form and sheet should generally review the statements on the sheet - especially costs - with the requestor, indicate how it is to be filled out, and answer any simple questions at that time. The requestor will be asked to return at a specific time with the completed search form for an appointment with the searcher.

In most cases interviews with the requestor and the searcher will be held prior to the search. During the interview the searcher and the requestor will discuss the problem to be researched and choose the database to be used. If convenient, a search strategy will be devised at that time and the search will be performed. The searcher may also elect to defer preparation of the search strategy until after the patron leaves.

Searches may be conducted with or without the requestor present. This is completely at the searcher's discretion. In cases where a search involves material with which the searcher is totally unfamiliar, the searcher should feel encouraged to consult printed reference sources to provide background that might improve the search effectiveness.

Searchers should anticipate problems which may arise online and discuss these fully with the patron before doing the search. Such problems may include the possible need to narrow, broaden, or otherwise modify the strategy as well as the format of the citations to be printed.

Searchers will discuss the procedure for payment before the online search is begun. Patron should be made fully aware of the financial obligation involved.

The searcher should discourage searches which can easily be done manually. This is an excellent opportunity to introduce the requestor to the printed sources available.

It is strongly suggested that the search interview be done in person rather than by telephone.

.43 The Search

The presence of the patron during the search is optional.

In deciding when to do the search, the searcher should consider factors which may affect cost, such as computer response time or rate schedules. Sometimes ports are full, response time is slow and disconnects occur randomly. Under these conditions a searcher may wish to consider trying at a later time. Temporary search saves can be made to avoid duplication of effort.

.44 Post-Search

It is the searcher's responsibility to compute the cost of each search. In the case of a DIALOG search, cost will be computed on the basis of connect time, database royalties, and offline print charges. In the case of SOURCE or COMPUSERVE searches, the cost is computed on the basis of connect time using the rate schedule in Appendix 1.

The searcher must enter information about each search in the search log (Appendix 5) at the completion of each search.

Patron payment should be made when the search is completed. Payment should be made in cash or by check. If the patron is not present and/or offline prints have been ordered, payment may be made at the time the prints are delivered.

If a questionnaire or other documents are to be given to the patron, they are to be delivered at the time payment is made.

The searcher is responsible for making sure that the patron will be able to use the results of the search. Usually this entails a brief discussion with the patron at the time the citations are delivered. In addition to pointing out various features of the printout format the searcher should indicate to the patron how to go about obtaining the materials, either in the local library collection, or through interlibrary loan.

4.5 Signon and Signoff

.51 To interact with any database vendor, initiate the terminal package, just as you would for interlibrary loan.

.52 Dial the appropriate network number:

Carlisle		
Uninet	249-1610	(300)
Harrisburg		
Tymnet	236-1190 or 233-8531	(300, 1200)
Telenet	236-6882 or 236-6914	(300, 1200)

.53 After you are connected, follow instructions of database vendor including sign-off.

CHAPTER FIVE

Local Databases

5.1 Costs

Staffing and supply costs of host institutions are absorbed by operating budgets of the participating libraries.

5.2 Rates

To be established. Harrisburg district residents who are registered library patrons will not be charged (depending on which database is accessed).

5.3 Financial Obligation

.31 Participating ODIN library bears cost, or patron is financially responsible (depending on residency, library affiliation and database used).

.32 Patron payment when search is requested (depending on which database is used).

5.4 Responsibilities of Searchers

.41 Maintenance of Effort

Review search manuals and guides to be provided by ODIN hosts. Consult with search coordinator at host and with other searchers.

.42 Scheduling of Appointments and Interviews

Patron required to fill out a search request form and information sheet. (Local database forms to be developed). Appointment made with patron in accordance with designated search time; depending on complexity of search, can be made at time of interview.

At time of interview the local database(s) to be used will be established as well as search strategy. The preliminary interview may be conducted by telephone but in person contact should be made prior to the conduct of a search.

.43 The Search

Patron's presence not required.

Search done during predetermined scheduled times (to be establshed by participating hosts).

.44 Post-Search

Searcher will compute cost of search.

Patron will be notified of final cost (if any).

Payment made in cash or check to host library.

5.5 Signon and Signoff

.51 To interact with the database, initiate the terminal package.

.52 Dial the appropriate host number:

HACC (717)-780-2462

DCL (717)-234-0799 or 232-7130

.53 After you are connected, follow instructions established and distributed by database host.

APPENDIX ONE

Table for Computing SOURCE and COMPUSERVE Online Charges

	7 a.m. - 6 p.m.	Evenings & Weekends
1. SOURCE		
1200 baud	$.43/min.	$.18/min.
300 baud	.20/min.	.09/min.
2. SOURCE Plus		
1200 baud	.58/min.	.33/min.
300 baud	.50/min.	.25/min.
3. COMPUSERVE (adjusted for database royalties)		
1200 baud	.78/min.	.50/min.
300 baud	.58/min.	.28/min.

Effective 9/83

ODIN: Online Database Information Network

Questions and Answers
about Commercial Databases

Q. How much will it cost?
A. ODIN costs are based on the cost of the databases used to answer your question. Typical searches cost between $10 and $100 with the average being $25. Payment may be made by cash or personal check.

Q. How do I know what databases are available and appropriate?
A. Your clear description of your search topic is usually sufficient for the reference librarian to determine which of the available databases should prove most effective and whether to recommend an alternative approach—either instead of or in addition to an ODIN search.

Q. Will an ODIN search satisfy all of my research needs?
A. Not usually. Your own good judgment and a reference librarian's advice will often suggest additional approaches to complement the computer search.

Q. Who does the actual searching?
A. Librarians, who are trained in using the computerized information retrieval system, and who also use the printed indexes, code books, abstracts and bibliographies of the subject area, regularly receive requests, conduct interviews and perform the actual search.

Q. How long does this take?
A. Once you have filled out a search request form, describing your topic in some detail, we can usually schedule a time for an interview and search within several days.

Q. What kinds of references does ODIN give me?
A. As in their printed counterparts, most of the contents of the computerized databases are journal article citations. Some databases contain citations of many types of documents; while other databases include only one form, such as technical reports, books or disserations. A few databases are numeric, while several others can reprint entire articles as well as citations.

Q. Will this library have the items that the computer search identifies for me?
A. This will vary both by subject area and type of document. As part of ODIN, librarians can advise you on the availability of the documents identified. Materials not available in the library may be requested through the Interlibrary Loan.

Q. How has ODIN been used?
A. ODIN searches have aided work on articles, books, investments, reports, research projects, bibliographies and grant applications.

Q. What or Who is ODIN?
A. ODIN is an acronym standing for Online Database Information Network. In Norse mythology Odin is, among other things, the god of knowledge and wisdom.

_____

ODIN FACTS

WHO: ODIN (Online Database Information Network) is a consortium of 8 libraries of various types in the Harrisburg Library District, which is comprised of four counties.

WHAT: ODIN is a microcomputer network designed to:

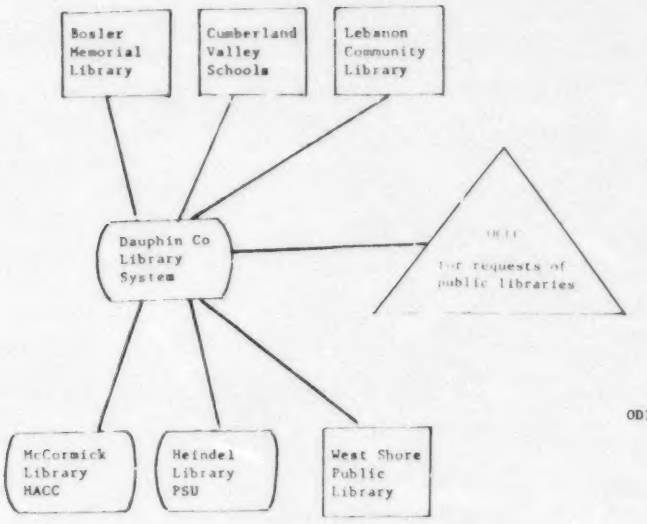
1) share training and expertise in accessing commercial databases such as Dialog, SOURCE, and Compuserve as well as to share publicity in promoting use of databases.
2) facilitate interlibrary loan via daily use of the network.
3) expedite the development and use of databases of local information such as genealogical records, community resources, etc.

WHEN: ODIN, funded by an LSCA Title III grant from the State Library of Pennsylvania, began in January 1983.

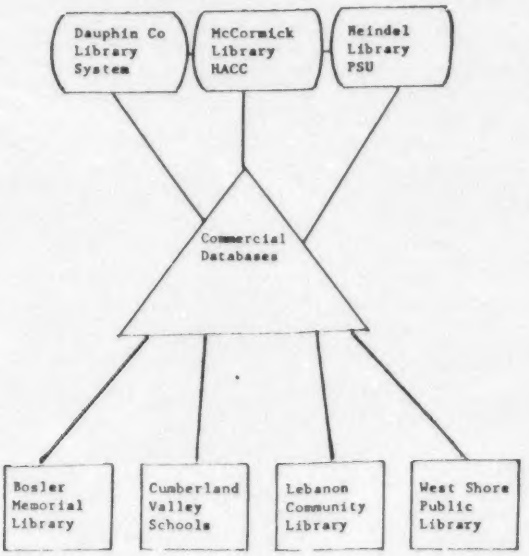
WHERE: ODIN's members are: Bosler Free Library, Cumberland Valley High School Library, Dauphin County Library System, Heindel Library at Penn State's Capitol Campus, Lebanon Community Library, McCormick Library at Harrisburg Area Community College, the State Library of Pennsylvania and West Shore Public Library.

WHY: ODIN puts multi-type library cooperation into practice. Shared training and publicity have made access to commercial databases a reality for Central Pennsylvanians. The interlibrary loan scheme has decreased the turnaround time by at least one day and has accessed collections at HACC and the Capitol Campus which were not available previously. The development of local databases through shared input will result in making needed information available to a wide population.

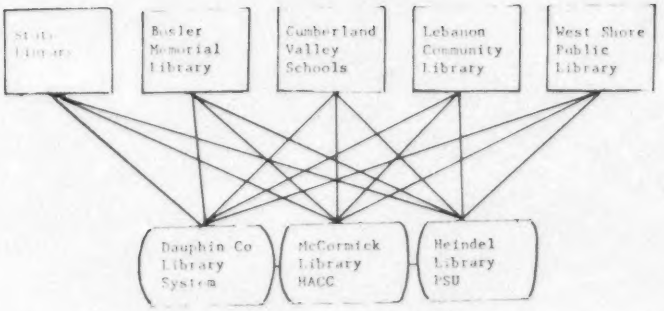
ODIN Interlibrary Loan Structure

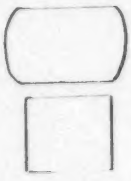


ODIN Structure for Accessing Commercial Databases



ODIN Local Database Structure





=Radio Shack Model 16 microcomputer (512K) with RS 232 interface, printer and two 300/1200 baud modems

DAUPHIN COUNTY LIBRARY SYSTEM

August 24, 1983

TO: ODIN Interlibrary Loan Participants

FROM: Annabel E. Fogal

RE: New ILL log-in instructions - effective Monday, 29 August 1983

For the last few weeks we have been running the host program for Interlibrary Loan on the TRS-80 Model III at the Central Library. During this period of time, a Periodicals request component has been added and the TRS-Xenix hard disc multi-user system initiated. Thus, a need for new log-in directions.

T - TERM - when entering T-TERM into the terminal the parameters (Ulart in the Menu) must be changed to

Baud = medium
Word = 8 bits
Parity = None
Stop bits = 1

After the phone call is placed and the connection is made, you may find yourself at varying parts of the program - depending how it has been left by the previous user. The following is a series of possibilities:

1) log-in - if this appears on the screen you must enter the program completely.
Responses are as follows:

login: type odin press ⟨ENTER⟩
password: type ill (this will not print on the screen)
press ⟨ENTER⟩
$ - type mbasic ⟨ENTER⟩
OK
type RUN"ILLSYS" ⟨ENTER⟩

2) $ - if this is the first symbol that appears type in mbasic; at the OK response type RUN"ILLSYS"

3) OK - if this is the first symbol that appears, type in RUN"ILLSYS"

4) you might be lucky and get the Interlibrary Loan menu immediately after placing the call and pressing ⟨ENTER⟩

101 WALNUT STREET · HARRISBURG · PA 17101
717·234·4961

* PLEASE BE SURE TO USE UPPER OR LOWER CASE LETTERS AS THEY APPEAR IN THE INSTRUCTIONS!

If you have anything else on the screen or are unable to enter any of these functions, please call me.

There are 2 things to keep in mind when using Xenix. 1) Because it is a multi-user system there may be pauses during which what you are typing does not appear on the screen or the cursor does not move - please WAIT - there may be someone else using another component of the system. Please do not type ahead. 2) In "Display Message" please wait for the prompt to hit ⟨ENTER⟩ or ⟨spacebar⟩ before continuing.

Periodical Requests - If you want to request a periodical article, choose 9 in the Interlibrary Loan menu. This will lead you to a separate, but similar, Periodicals Menu. Please enter your requests as the instructions indicate.

Periodical requests will not appear in the "Display All Requests" segment of the Main ILL Menu. To find out if any library has placed a periodical request, you must work from the separate Periodical Menu.

Please don't hesitate to call if you have any questions.

Good luck!
